| 1       | Description                     | The material shall consist of a suspension of particles of technical azoxystrobin and tebuconazole in an aqueous phase together with suitable formulants. After gentle agitation, the material shall be homogeneous and suitable for further dilution in water. | Complies |
| 2       | Azoxystrobin Content (g/l)      | 11.00% Min                                                                                                                                                                                                                                                      | 11.06    |
| 3       | Tebuconazole Content (g/l)      | 18.3% Min                                                                                                                                                                                                                                                       | 18.32    |
| 4       | Suspensibility % by mass        | 90.00% Min                                                                                                                                                                                                                                                      | 92.40    |
